

42. The air-conditioning apparatus according to claim 41, wherein difference of the room pressure measured in differential levels is eliminated by correction parameters.

C<sup>3</sup> 43. (New) The air-conditioning apparatus according to claim 40, wherein the channel pressure of the supply air is decreasing with decrease of difference between a desired value of the room temperature and an actual value of the room temperature.

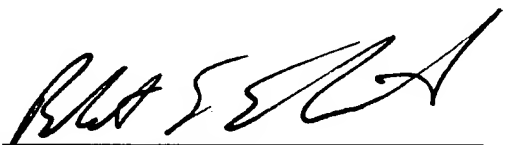

### REMARKS

Applicant appreciate the time and consideration provided by Examiner in reviewing this application and respectfully submits that the claims 33-36, 38 and 40, as filed on November 18, 1999 and amended by this amendment, as well as the newly filed claim 43 are readable on the provisionally elected species of an air conditioning apparatus, wherein the desired condition in the room depends on the exhaust air pressure and the supply air pressure as elected in response to election requirements filed on May 12, 1999.

It is respectfully submitted that all pending claims of the application as now presented, are supported by the specification, formally correct and allowable on the merits over the art of record. A favorable action is respectfully requested.

The Commissioner is hereby authorized to charge any fees associated with this communication to our Deposit Account no. 50-0305. If any additional information is required, the Examiner is invited to contact Robert J. Schneider at (312) 845-3919.

Respectfully submitted,

By:   
Robert J. Schneider
